The screenshot displays the Ruijie Network Management System interface. On the left, a sidebar contains navigation options: 名称 (Name), 输入方式 (Input Method), 标准化策略 (Standardization Strategy), IP范围 (IP Range), 事件过滤 (Event Filtering), 是III归并 (Is III Merging), and 描述 (Description). The main area shows a table of devices with columns: 序号 (Serial Number), 名称 (Name), 类型 (Type), 子类 (Subtype), 严重级别 (Severity Level), 设备IP (Device IP), and 时间 (Time). The table lists several 'Unknown' devices. A red box highlights the '详细信息' (Detailed Information) button for the first row. A red arrow points to this button with the text '点击查看详细信息' (Click to view detailed information). Below the table, a detailed view of a collector is shown. A red box highlights the '采集器名称' (Collector Name) field, which contains 'comm_coll'. A red arrow points to this field with the text '显示为comm_coll,说明没有正确匹配采集器' (Displayed as comm_coll, indicating that the correct collector was not matched). The '采集器地址' (Collector Address) field shows '192.168.100.134'. The '采集器网络' (Collector Network) field shows '缺省网络' (Default Network).

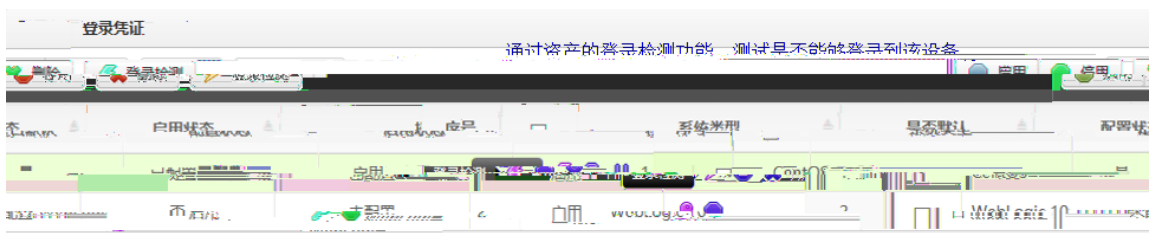

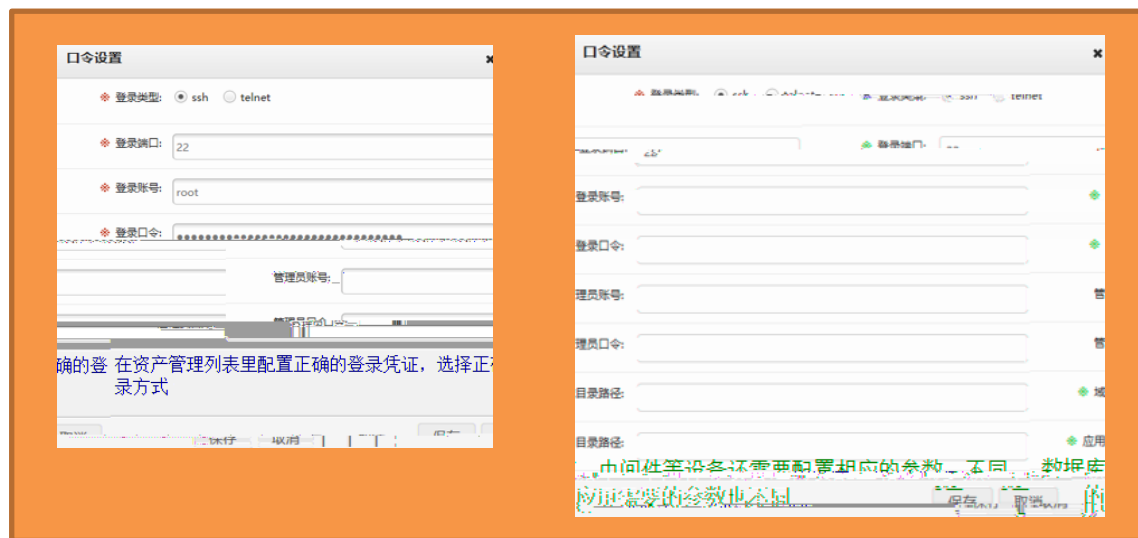

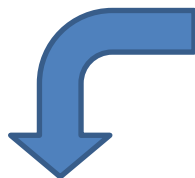

序号	名称	类型	子类	严重级别	设备IP	时间
