The image shows a web-based configuration interface for a router. At the top, there is a progress bar with four steps: 1. 重置密码 (Reset Password), 2. 接口配置 (Interface Configuration), 3. WiFi设置 (WiFi Settings), and 4. 高级配置 (Advanced Configuration). Step 1 is currently selected and highlighted. Below the progress bar, the title '重置密码' (Reset Password) is displayed. A message box states: '当前密码为默认密码，为提高系统安全性，请修改密码。' (The current password is the default password. To improve system security, please change the password.). Below this message, there are three input fields: '用户名:' (Username) with the value 'admin', '新密码:' (New Password) with a masked input field, and '确认密码:' (Confirm Password) with a masked input field. At the bottom of the form, there is a blue button labeled '下一步' (Next Step).

The image shows a router's web-based configuration interface. At the top, there are four numbered steps: 1. 重置密码 (Reset Password), 2. 接口配置 (Interface Configuration), 3. WIFI设置 (WIFI Settings), and 4. 保存配置 (Save Configuration). The current step is '接口配置'. Below this, the '接口信息配置' (Interface Information Configuration) section is visible. It shows 'WAN2' selected as the interface type. The '运营商' (Operator) field is set to '其他' (Other). The '用户名' (Username) and '密码' (Password) fields are empty. The 'PPPoE(ADSL)' option is selected. At the bottom, there are buttons for '上一步' (Previous Step), '跳过' (Skip), and '下一步' (Next Step).
